UI Automation The UI Automation API is the mechanism by which .NET programs interact with applications that have built-in support for it, such as Microsoft Office and Internet Explorer. The UIA enables a program to discover and control other applications, and perform some basic actions such as reading and writing files, cutting and pasting, making HTTP requests, reading the registry, etc. This is a powerful tool for the creation of applications for non-graphical based user interfaces, which are often platform dependent, or not suitable for GUIs with a direct user interaction. UI Automation also has a native support in AutoCAD Torrent Download via Cracked AutoCAD With Keygen's .NET plugin, also known as: The Application Programming Interface (API) for .NET.
